# SCOPM ACTION PLAN

# Straw-man Action Plan

- **SCOPM Mission**

- The Standing Committee on Performance Management is dedicated to provide State DOTs the expertise and resources to support performance based management and to create a results-driven environment to maximize the performance of both transportation systems and organizations.

- **Goals**

1. Serve as the center of leadership and excellence for performance management within AASHTO.
2. Strengthen the collaboration and communication across all states in advancing performance management best practice.
3. Focus on all aspects of performance management important for states not just the MAP-21 requirements.

- **Task Forces**

- Policy and Rulemaking
- Communications
- Best Practices and Research

AASHTO SCOPM MAP-21 Notice of Proposed Rule-Making Checklist (Safety)

## AASHTO SCOPM MAP-21 Checklist

### Performance Area – Safety

#### Document Overview

MAP-21 legislation requires States to:

- Report the annual numbers of serious injuries and fatalities and serious injuries and fatalities per vehicle mile traveled – based on specific measures established by the Secretary of Transportation
- Set performance targets for each of the established national measures
- Submit biennial performance reports on the established measures and targets
- Meet, or make significant progress toward meeting, established targets
- Satisfy special rules for high-risk rural roads and older drivers
- (Conform to additional Highway Safety Plan reporting requirements)

The Notice of Proposed Rulemaking (NPRM) for implementing the provisions of the legislation is expected to include more specific implementation details on measure calculation and definition, data sources, and the processes for target-setting and performance reporting.

This document provides a set of checklists that can be used to assist in the review of the MAP-21 Highway Safety NPRM. The checklists may suggest areas where comments are warranted to ensure that the final rules (1) support current or desired state performance management processes and (2) can be implemented in a manner that minimizes burdens on limited state resources. The checklists were based on the recommendations developed through the AASHTO Standing Committee on Performance Management (SCOPM) Task Force on Performance Measure Development, Coordination and Reporting. These checklists reflect the input that was provided by the Task Force to FHWA on rules related to national performance measures and targets.

Each section of this document presents a summary of the relevant statutory provisions, a statement of what additional guidance may be provided in the NPRM, and a checklist of considerations that some States may wish to see reflected in the final rules.
